

Year 6's Term One

It has been a busy first term in Year 6! So here is just a quick taste of some of the things we have been up to!

Our first writing genre this term was learning how to write and deliver persuasive speeches. The kids wrote some terrific speeches as they applied for leadership roles within the school. Delivering them in front of other classes, parents and teachers inevitably induced some butterflies but they were absolutely fantastic!

In Maths, we have been focused primarily on Number (calculating with all four operations) and Measurement (metric units, perimeter and area). We have also looked at improving our problem-solving skills.

Our Chinese lessons have also kicked in. Our tutor, Jessica, who teaches via video-link from China has been impressed with how the children have taken to their new

language!

Our excursion this term was to Sculptures by the Sea – a big thank you to ALCOA for running what was a terrific day out.

In their Technology unit with Mrs Miller, the children have been busy creating interactive anti-bullying posters using Green Screen and Augmented Reality.

Our time at Camp was memorable, providing memories that will last for a long time. The children were challenged to push beyond their comfort zone and

responded magnificently. From raft building to orienteering to team-building games, the children demonstrated their capacity for learning and challenging themselves!
